## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-8 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 10/601,471. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method described in the copending application is very similar to the method used in the instant application. In both instances, films are irradiated to induce crosslinking of the materials / layers. The effect of doing this in a multilayer film in either instance would be the same.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### *Response to Arguments*

3. In view of the applicants' arguments and amendments to the claims, the previous rejection is withdrawn. The examiner notes that the PCT search report lists a number of

Art Unit: 1773

references as X references. The examiner does not believe that these references teach the claimed invention. While the WR Grace references teach the use of crosslinking agents in films, they are not added to for the expressed purpose of crosslinking two "incompatible" polymeric films. The examiner notes that adhesive layers are precluded here and this is what is typically used in the prior art.
